## Synopsis Books:

After a rogue artificial intelligence takes over the entire space colony Gnosis, Earth itself is the next target. Grant Jemson, an ex-pilot turned gamer with a fear of space, must face his troubled past in order to stop it. His partner is John Ridley, a special agent with a personal vendetta that could jeopardize their mission. As part of its plan, the A.I. manipulates the colonies into declaring a war of independence against the Earth. Grant and Ridley must race against the clock in order to both save the Earth and prove to the colonies that they have been tricked. Will they be able to overcome their personal struggles and pull off the most daring mission space has ever seen, or will the A.I. triumph and enslave the Earth?
